

The Awakener

The Awakener is a very special plate. It's only available on special orders.

They are very limited, so there may be quite a wait for them at times.

This is a very focused little plate and as you can see it has a large hole in the centre of this oval plate.. A large amount of energy flows through the centre and is very good for activating the energy of the third eye.

If you are looking to open the third eye or calm and focus your mind, then this will be the plate for you.

After many years of development and testing, the Tesla's Awakener was just released 2019.

We are finding it has a great ability to help your third eye or to clear and focus your mind.

When placed over your eye it can help with vision.

You can treat both eyes at once with two awakeners. Stick the Awakener Plates to an old set of glasses frames that have their lenses removed, or buy a cheap pair of plastic play glasses from the two dollar store. Bluetack works great when fastening the Awakener Plates to the frames.

It can also be placed over bottles for balancing the energy of the content and increasing the life force.
It can be used for many things

Have fun exploring
